

ASSEMBLY RAILS

LENGTH: 1000MM | WIDTH: 8MM

For the prefabrication of heating mats. The ideal plug-in system allows any length of joining of the individual rails. Through the narrow grid size is almost every usual cable laying distance possible. The material is UV-resistant and heat-resistant up to 100 °C.

TECHNICAL SPECIFICATIONS

Bar length:	1 m
Bar width:	8 mm
Mesh size:	20 mm – 25 mm
Cable diameter:	3,5 – 8,0 mm

CE

GRID BARS

The assembly rails are installed in the provided clamping devices, pressed crosswise onto the grid bar and build a plastic grid of 1,0 m × 1,0 m each. Due to the eyelets or pins at the end of the assembly rails the grid can be expanded in all directions.

The final size can be cut with a side cutter.

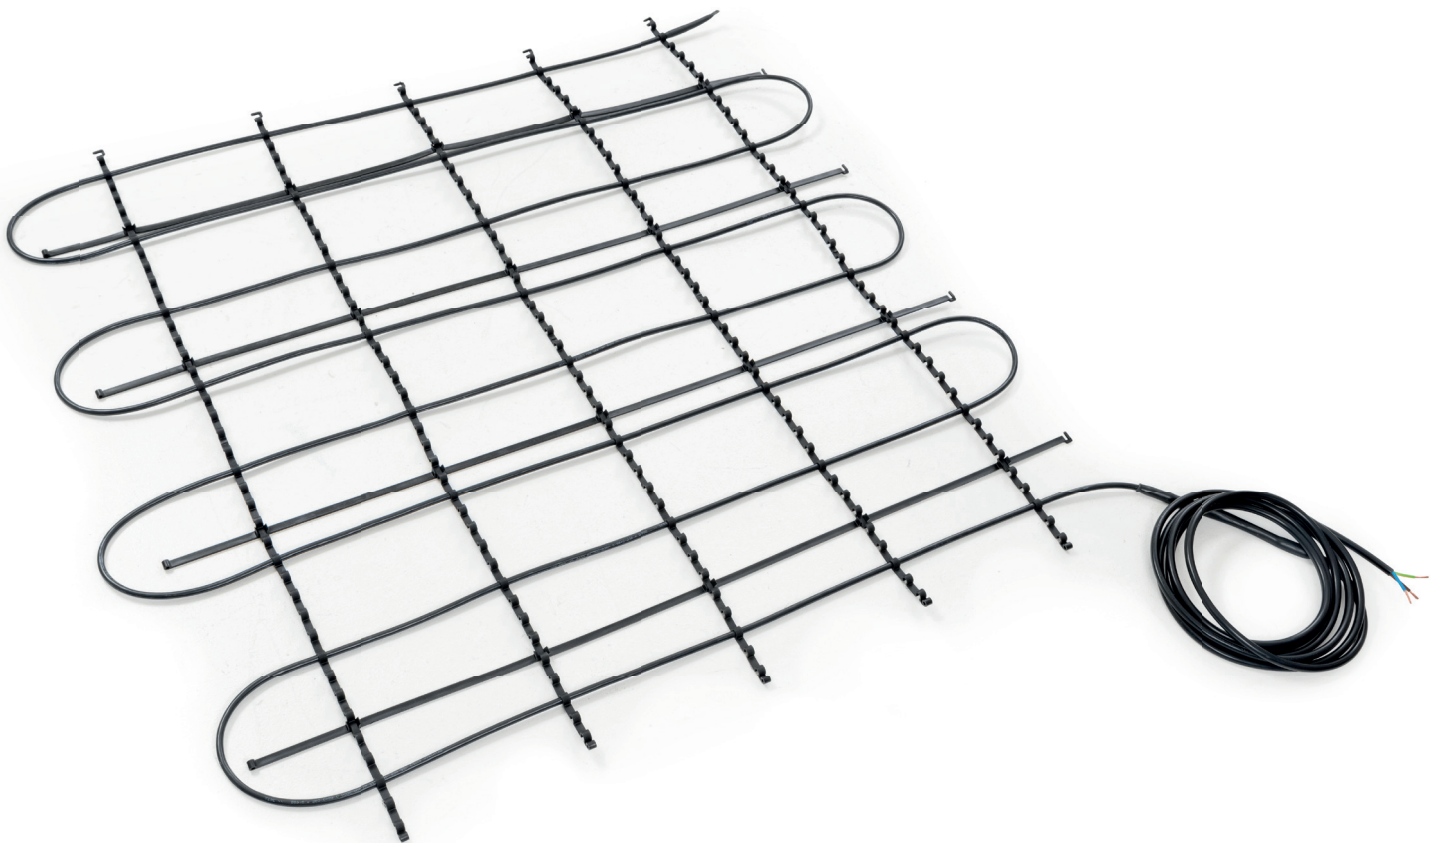

ASSEMBLY RAILS

Length: 1000mm | Width: 8mm

TYPE	GRID	CABLE Ø
MS-I	20 mm	3,5 mm to 4,5 mm
MS-II	25 mm	4,6 mm to 5,5 mm
MS-III	25 mm	5,6 mm to 6,5 mm
MS-IV	25 mm	6,6 mm to 8,0 mm

Packaging: in package of 100 pieces
